Motor vehicle registration offered online

LĪHU'E – Renewing your motor vehicle registration just got easier. The County of Kaua'i is now offering an online motor vehicle registration renewal service at www.kauai.gov/mvr.

The system is maintained on secure servers and uses the latest encryption technology to ensure privacy, security, and data integrity.

"We are pleased to launch another online service that's designed to help make county government more accessible to the general public and is part of our overall plan to improve efficiency," said Mayor Bernard Carvalho, Jr.

Citizens can access the online system by providing the last four digits of their Vehicle Identification Number (VIN) and their license plate number. The user-friendly interface guides the user through the entire payment process.

The fee may be paid with a credit card (Visa, MasterCard, American Express, or Discover) or electronic check.

Upon confirmation of payment, a receipt will be emailed and may be printed for recordkeeping.

The new registration certificate and emblem will be mailed to the customer via the U.S. Postal Service.

The motor vehicle registration renewal is the most recent addition to the county's online services.

The County of Kaua'i was the first in the state to offer real property tax payments over the Internet, and has since added sewer payments, as well as the ability to view building permit status online.

For more information about the county's online motor vehicle registration renewal service, please call 241-6577.
